fields for you to complete

Complete the OFFICIAL forms issued in the tender pack - never retype or substitute them (an explicit disqualifier at about a third of buyers). This pack mirrors each form field-for-field so you can transcribe values onto, and check them against, the official forms.

3 FATAL compliance gate(s) still open on this bid - submitting now risks disqualification. See the warning page.

⚠ OPEN FATAL COMPLIANCE GATES

This bid is NOT submission-ready. Each item below is a Fatal gate from the deterministic compliance layer - submitting with any of them open risks outright disqualification:

- Fatal checklist item still open: Municipal rates and taxes clearance for the COMPANY and EVERY DIRECTOR - the arrears threshold is BUYER-SPECIFIC (90 days at some, ONE month at others, including arrears with any other municipality) and a settlement arrangement can save you; renters use a certified lease (plus affidavit at some buyers); start collecting director proofs on day one [GATE-RATES]
- Missing or expired compliance artifact: Audited Financial Statements (required by GATE-MBD5 - MBD 5 + three years' audited AFS (municipal above R10m))
- Fatal checklist item still open: Confirm CIDB 6CE registration ACTIVE through the 120-day validity period and file the certificate as returnable B1 - tracked manually: GATE-CIDB does not auto-attach under the MBD regime. [manual]

Close every gate on the bid checklist (and file the required Compliance Artifacts), then regenerate this pack.
